CARTMOVER XR

CART TUGGER

**QUICK SHIP
PRODUCT**

Moving heavy carts shouldn't slow production—or put your workforce at risk. Engineered to give a single operator the power, control and confidence to move heavy wheeled loads safely and efficiently, the CartMover™ XR is our most capable cart tugger yet. Combining exceptional pulling power, an ergonomic high-visibility design, a quick-change lithium battery and the versatility to handle virtually any cart, the XR helps manufacturers improve productivity, reduce operator strain and create a safer workplace.

A safe and efficient, self propelled tool for moving heavy carts in manufacturing environments, the CartMover™ XR is the newest model in a legendary line of battery-operated material handlers.

Based on the well-proven CartMover™ design, the CartMover™ XR increases productivity and ensures worker safety wherever loads on wheels need to be moved. It's as easy to use as a pallet jack – just far more powerful. It's tough, portable and convenient. No more injuries from pushing or pulling carts between work stations.

With a capacity of over 10-tons*, the CartMover™ XR handles carts of almost any size, it features a sleek, high-visibility ergonomic design, a new high-performance, quick-charge, long-life battery and an expanded lift range that accommodates ramps, inclines and uneven floors (Depending on the type of move and environmental conditions). The CartMover™ XR Drives Productivity & Increases Safety!

Features

- Sleek, high-visibility ergonomic design
- Expanded lift range can handle almost any cart
- Quick-Change, 24V Lithium Iron Phosphate battery
- Compact size and extraordinary versatility
- Adjustable speed control to 4.5 mph
- Massive 10+ ton capacity*

We Engineered CartMover XR to Keep Workers Safe

We believe people like to be productive. That's why so many injuries occur every year as workers try to move heavy loads by themselves. They either think the load will easily roll on its existing wheels or they simply aren't patient enough to wait for a forklift or tow motor. The CartMover™ XR changes that by giving load handling control directly to the operator in the work cell where it is needed.

The CartMover™ XR is a heavy-duty tool made for the toughest environments, but is easily maneuvered by workers. The battery-operated CartMover™ XR provides mobility that increases worker productivity while enhancing safe work practices.

Expertly Engineered to Increase Safety & Productivity

Where Can CartMover™ XR Be Used?

ANYWHERE you need to move loads on casters or wheels:

- Cell-manufacturing facilities
- Heavy equipment manufacturing
- Printing and converting facilities
- Shipping and Receiving
- Laundry facilities

Choose Your Hitch

The CartMover™ XR can be equipped with a variety of pre-engineered or custom hitches to connect securely to your specific carts, bins, vehicles or other wheeled loads.

Easy, No Down Time Charging

The CartMover™ XR has a high-performance, quick-charging modular battery pack and a separate battery charger. It will always be ready to move your loads.
