Web and Converting Solutions

Enhance Safety • Increase Speeds • Improve Operations

Core Chucks & Safety Chucks

From our legendary DF-2000 Core Chucks to our Auto-Lock Safety Chucks and more, Double E Group has a full line of proven chuck solutions for your converting needs.

Core Shafts

Double E Group offers a full range of shafts of all types, from narrow web and small diameter shafts to our high-performance lightweight lug and strip shafts. We have your solutions.

Brakes & Tension Control

Double E Group's EE250 Pneumatic Brakes, pads and tension control products offer increased performance and flexibility in your web lines.

Roller Solutions

Double E Group offers a variety of roller-based solutions including its line of idler rollers as well as its WrinkleSTOP® and bowed rollers.

Core Cutting

Available in easy-to-use manual versions or fully automated systems, our Core Cutters are famous for their burnished cut and virtually dustless operation.

Material Handling

Double E Group offers a wide variety of material handling solutions. From our RollMover™ & CartMover™ solutions to an extensive line of crane-based and floor-mobile material handling products including Dotec's wide range of material handlers. When you need to move material safely and easily - think Double E Group.

Knives & Slitting Systems

Double E offers a full range of slitting solutions featuring a variety of individual knives, modules, and positioning systems.

Surplus and Trim Management

Double E Group also offers safe, productive and hands-free slabbing solutions as well as Pneumatic Trim Winders and Vacuum Trim Collection. All offer the safe and easy reclamation of recyclable materials.
