

DOUBLE E G R O U P

Web and Converting Solutions

Enhance Safety • Increase Speeds • Improve Operations

Core Chucks & Safety Chucks

From our legendary DF-2000 Core Chucks to our Auto-Lock Safety Chucks and more, Double E has a full line of proven chuck solutions for your converting needs.

Core Shafts

Double E offers a full range of shafts of all types, from Converttech's narrow web and small diameter shafts to Double E's own high performance lightweight lug and strip shafts.

Brakes & Tension Control

Double E's new EE250 Pneumatic Brakes, pads and tension control products offer increased performance and flexibility in your web lines.

Roller Solutions

Double E offers a variety of roller-based solutions including its Epoch line of idler rollers as well as bowed rollers and spreader rollers.

Core Cutting

Available in easy-to-use manual versions or fully automated systems, Appleton Core Cutters are famous for their burnished cut and virtually dustless operation.

Material Handling

Double E offers a wide variety of material handling solutions. From Appleton's RollMover and CartMover solutions to Schlumpf's extensive line of crane-based and floor-mobile material handling products, Double E has a product to meet your needs.

Knives & Slitting Systems

Double E offers a full range of slitting solutions featuring a range of individual knives, modules and the innovative LYNX digital positioning slitter system.

Slabbing and Trim Winding

Double E also offers Appleton's safe, productive and hands-free slabbing solutions as well as Daven Trim Winders. Both offer the safe and easy reclamation of recyclable materials.
