FOX TrimAway TRIM & MATRIX REMOVAL

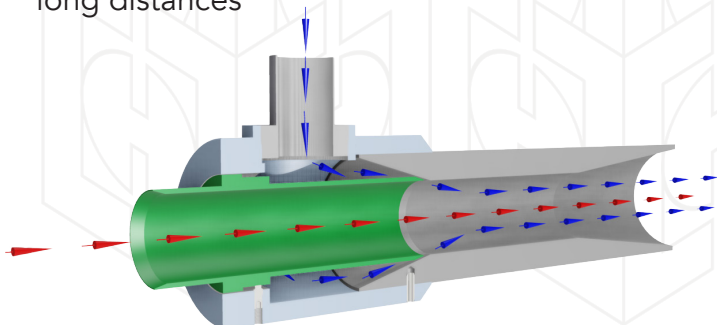

FOX TrimAway systems deliver a clean, efficient, and versatile way to remove trim and matrix material for a wide range of converting operations. FOX TrimAway systems can be used to remove trim from paper, film, foil, textile, or nonwoven products as well as matrix materials. Designed to be installed quickly and easily, FOX TrimAway systems can be added to existing systems with limited downtime.

VENTURI PRINCIPLE

FOX TrimAway system's exclusive venturi design uses the blower's own airflow to create powerful suction and discharge pressure—eliminating the need for moving parts or compressed air. This delivers a quieter, more energy-efficient system with minimal maintenance required.

Benefits:

- Waste travels in a straight, unobstructed path
- Continuous and intact trim eliminates the need for chopping, minimizing wear & maintenance
- Waste can easily be conveyed over short or long distances

FEATURES

- FOX TrimAway exclusive venturi design that works with a variety of materials
- Increased energy efficient compared to compressed air systems thanks to regenerative blower technology
- Fast and easy setup for minimal downtime
- Low maintenance
- Stationary or portable configurations available
- Various optional add-ons available:
 - Silencers
 - PTFE lining
 - Collection bags
 - and more to customize the system for various types of productions

FOX TrimAWAY LINE

TRIM CONVEYING SYSTEMS

- Remove edge trim or continuous pieces from web converting lines quickly and efficiently
- Compact venturi and blower boast a compact design to save space and easily mount – various mounting options and configurations available
- Systems are quiet without silencers
- Aluminum-constructed venturi
- Regenerative blower provides high energy efficiency and low maintenance
- Flexible and rigid duct available
- PTFE lining is available

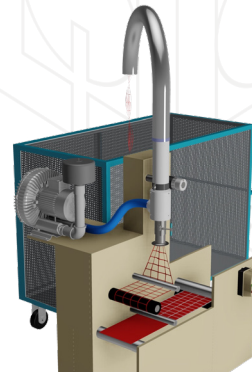

RUNNER PORTABLE WASTE REMOVAL SYSTEMS

- Available options: One Pick-Up, Two Pick-Up, Matrix removal, and with Chopper
- Portable for operation at different stations
- Fast & easy installation and operation
- Single, welded tubular steel mounting frame on durable swivel locking castors
- Suited for permanent, semi-permanent and temporary applications

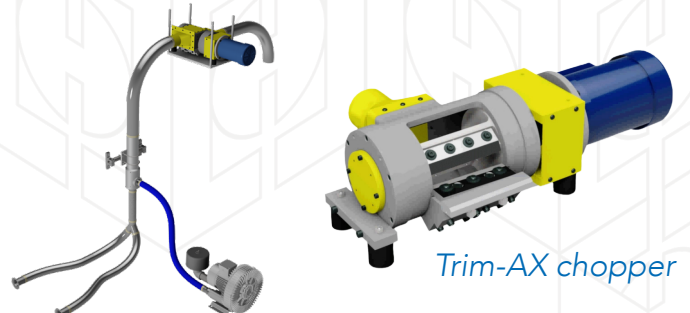

MATRIX CONVEYING SYSTEMS

- Eliminates the need to run wider/more costly webs or use cardboard cores in the rewinding process
- Matrix remains in its typical threading pattern – no need to chop the matrix
- Fast & easy setup – mounts to existing matrix rewinds shafts; blower can mount to the floor or machine frame
- PTFE lined components and plasma coated choppers are available
- Handles wide matrix & high running speeds

CONVEYING SYSTEMS WITH CHOPPER

- Built on the FOX TrimAway system with the addition of the Trim-AX chopper
- Designed to chop extremely light to very thick and heavy materials
- Minimal vibration, noise, and maintenance
- Trim-AX chopper improves conveying distance, enhances efficiency, and reduces the volume of waste in collection bins

Trim-AX chopper
