

Flexible Packaging Solutions

Double E Group - Engineering Excellence

Double E Group products combine innovative solutions with high-quality manufacturing to be the best source for mission-critical, high-performance components for the Web Converting and Packaging Industries.

Double E Group offers a full range of engineered products including core chucks, core shafts, safety chucks, brakes, web guides, rollers, core cutters, core plugs, reel spools, knives, slitting systems, roll stands, slitting modules, trim collection and material handling solutions.

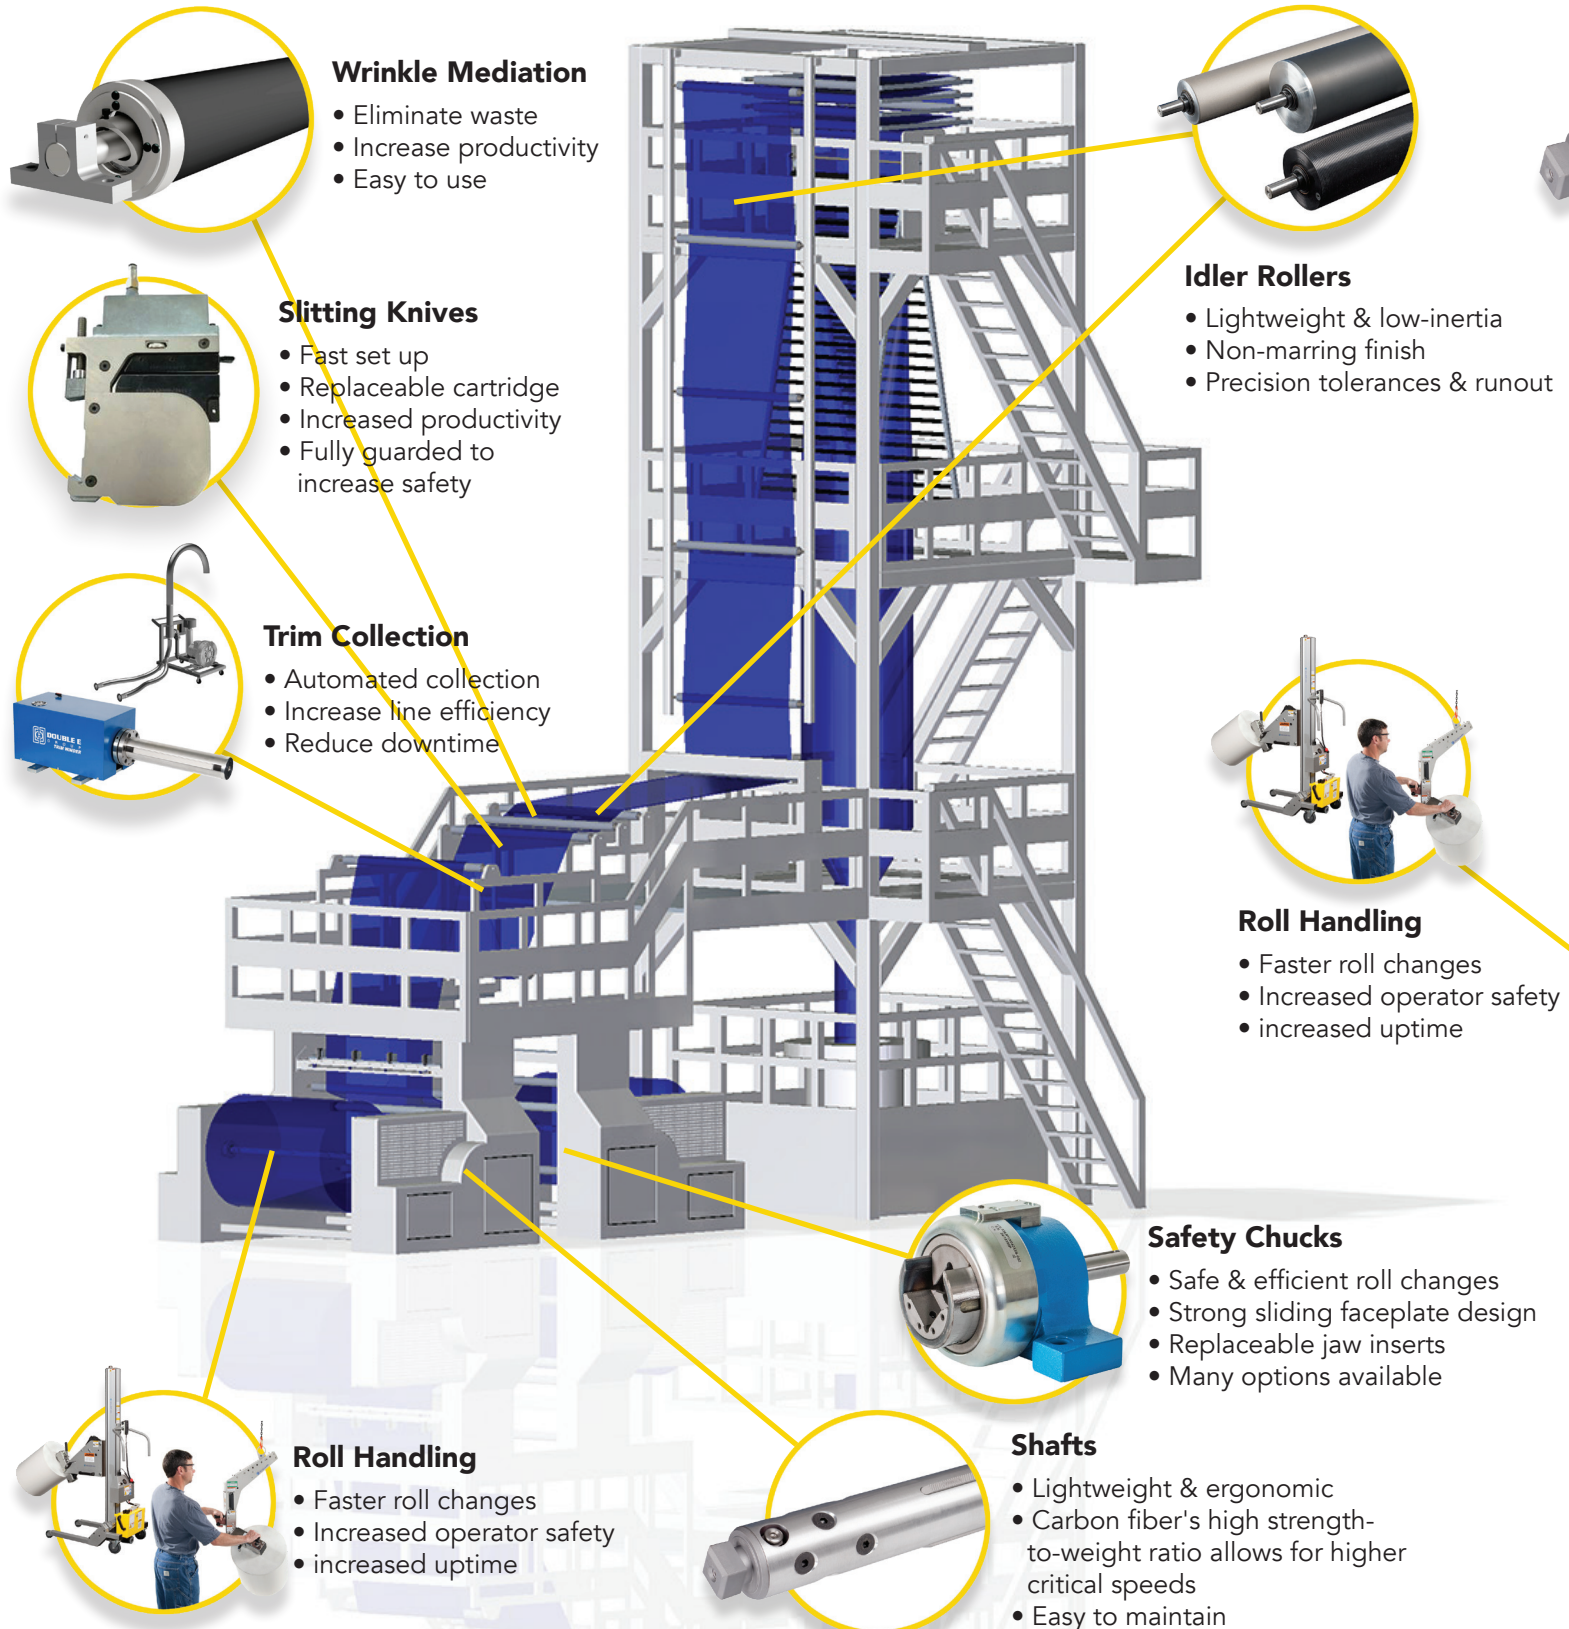

Double E Group has a solution for you.

Critical Components - Blown Film Process

Flexible Packaging Solution

Shafts

- Lightweight & ergonomic
- Carbon fiber's high strength-to-weight ratio allows for higher critical speeds
- Easy to maintain

Idler Rollers

- Lightweight & low-inertia
- Non-marring finish
- Precision tolerances & runout

Brakes

- Proven performance
- Long pad life
- Excellent control

Load Cells & Tension Control

- High accuracy
- Intuitive operation
- Multiple configurations

Ultrasonic Sensor

- Measure roll diameter
- Accuracy: .02" / .5mm

Shafts

- Lightweight & ergonomic
- Carbon fiber's high strength-to-weight ratio allows for higher critical speeds
- Easy to maintain

Mid-Process: Coating Line

Double E Group offers a wide variety of high-quality critical components for blown film operations that increase productivity and safety.

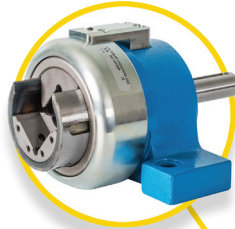

Differential Shafts

- Automatic engagement and disengagement of rings
- Consistent web tension
- Bidirectional

Brakes

- Proven performance
- Long pad life
- Excellent control

Safety Chucks

- Safe & efficient roll changes
- Strong sliding faceplate design
- Replaceable jaw inserts
- Many options available

Slitting Knives

- Calibrated operator setup knobs
- Replaceable cartridge
- Safety guards to protect operators

Trim Collection

- Automated collection
- Increase line efficiency
- Reduce downtime

Core Chucks

- Rolling friction prolongs life
- Dust-free operation
- Easy to maintain

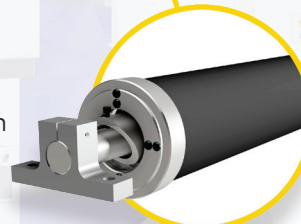

Ultrasonic Sensor

- Measure roll diameter
- Accuracy: .02"/.5mm

Core Cutters

- Increased flexibility
- Virtually dust-free operation
- Lower production costs
- Increased productivity

Wrinkle Mediation

- Eliminate waste
- Increase productivity
- Easy to use

End Process: Slitter-Rewinder
