SA60

SEMI-AUTOMATIC CORE CUTTER

***Professional Core Cutting!
Exceptional Value!***

Whether producing short production runs or supporting daily converting operations, the Appleton SA60 delivers dependable, on-demand core cutting with the accuracy and reliability manufacturers have trusted for generations. Its rugged design and legendary cutting performance make it an ideal solution for low to medium volume production environments.

Engineered for Everyday Performance

Appleton's entry-level SA60 is a rugged, economical, fixed-knife core cutter. It features the legendary "Appleton Cut". The smooth, burnished edges and accurate cuts make up the Appleton Advantage. Ideal for low to medium volume in-house core cutting, the SA60 Core Cutter quickly cuts cores on demand, which increases production speeds while saving valuable floor space otherwise lost to pre-cut core storage.

Easy-to-Use

Simply set the desired cut length, advance a core to the target and step on the foot pedal. The air-assisted cut-off knife quickly and accurately cuts a core to length.

The Famous "Appleton Cut"

Appleton's fixed knife technology produces a clean, burnished cut. Its virtually dustless operation eliminates the need for noisy vacuum systems and increases worker and environmental safety.

Quick & Easy Changeovers

The SA60 Core Cutter uses the patented Appleton IDC (Instant Diameter Change) tooling system to make quick work of core size changes to increase productivity.

Specifications

Maximum Parent core length range

- Up to 60 inches (1524 mm)

Core diameter range

- 3" (76 mm) to 6" (152 mm) I.D.*
*with additional and proper tooling

Wall thickness

- Up to 1/2" (13 mm)

Cut length range

- Minimum cut length 1" (25.4 mm)
- Maximum length: 30 inches (762 mm)

Utilities

- 110-120V/50-60Hz/Single phase
- 80 PSI air, 1 cfm @ 50 cuts/min (average, your results may vary)

Dimensions

- Length: 122 Inches
- Width: 30 inches
- Height: 50 inches

Appleton Support

The SA60 Core Cutter is backed by Appleton's outstanding support. Whether you need technical assistance, service or replacement parts, Appleton will be there for you. Appleton still provides parts and service for core cutters built over 65 years ago – our tradition of superior support adds long-term value to your Appleton core cutter investment.
